Mr. PREVOST took the Chair.

On the motion of Mr. R. Taylor, seconded by Dr. Boott,

RESOLVED UNANIMOUSLY,—That the thanks of the College be given to Mr. Warburton for his kindness in presiding at this Meeting, and for his conduct in the Chair.

REPORT.

STUDENTS.

In the Session 1847–48 the number of Students was as follows:—Faculty of Medicine, 315; Faculty of Arts, 252; Junior School, 308; total 875. In the College Classes of both Faculties the number exceeded that of the former year—in Medicine by 12, in Arts by 21. Of the Students in Arts, 43 were of the Classes for Schoolmasters, and 4 of the Birkbeck Summer Course of Practical Chemistry. In the Junior School the Pupils were less by 46 than in the preceding Session; the highest number in any one term was 269. The amount of fees was 15,302*l.* 14*s.*, of which sum, 7485*l.* 6*s.* was received from Medical Students, 3932*l.* 8*s.* from Students in Arts, and 3885*l.* from the Junior School. The share of the Professors and Masters, besides augmentations of 150*l.* per annum each to the Professors of Anatomy and Physiology and of Natural Philosophy and Astronomy, and the 90*l.* a year of the Patriot Endowment Fund among the four Professors engaged in the Schoolmasters' Classes, was 9572*l.* 1*s.* 8*d.* The College portion was 3195*l.* 8*s.* 4*d.* The sum of 2535*l.* 4*s.* was received from Students in Hospital Practice, and was contributed towards the support of the Charity.

The entries for the current Session up to this period are 261 Medical Students, of whom 57 are new: last year, at the corresponding period, the numbers were respectively 284 and 92; in 1847 they were 280 and 68. The new entries to Hospital Practice are 49; last year they were 92; in 1847, 79. To the Classes of the Faculty of Arts the number, exclusive of 46 to the Schoolmasters' Classes, entered up to this day, are 206. The new Students are 104, an increase of 7 in the aggregate, and a decrease of 3 in the number of new Students. There has been a further increase in the Class of Mathematics, which now consists of 123 Students: last year the number was 117. The Class of Latin has this year 79, an increase of 7. The Class of Architecture, with a slight increase of the fee, has also advanced in numbers from 29 to 32. The Class of Analytical Chemistry in the Birkbeck Laboratory has progressively increased since its establishment, and now contains 23 Students.

The number of Students from the College who took Degrees at the University of London was as follows:—LL.D. 1, of 2; M.D. not any; the Degrees conferred were 11 from 7 schools; M.A. 1, of a total of 4 from 3 schools; LL.B. 2, of a total of 4 from 3 schools; B.M. 4, of a total of 17 from 9 schools; B.A. 19, of a total of 41 from 14 schools; in all 27 Graduates from this College, of a total of 65 from 28 schools. Of Undergraduates, of a total of 22 from 8 schools, 6 were from University College, and 38 passed the Matriculation Examination, the total being 161 from 36 schools.

The University Prizes obtained by Students of this College at the Examinations were:—The Doctor of Laws Gold Medal (value 20*l.*) by Mr. Frederic John Wood on taking that Degree: the Gold Medal (value 20*l.*) for the first in Logic, Moral Philosophy, Philosophy of the Mind, Political Philosophy, and Political Economy, by Mr. Walter Bagehot on taking the Degree of M.A.: the Chemistry Exhibition by Mr. William Morse Graily Hewitt on passing the First Examination for the Degree of Bachelor of Medicine: the Mathematics Scholarship by Mr. Robert Braithwaite Batty on taking the Degree of B.A. Book Prizes value 5*l.*: Chemistry, by Mr. John Gotch Hepburn: Animal Physiology, Mr. John Crown Agnis on taking the Degree of B.A.: on the voluntary Examination in the Scriptures (Hebrew and Greek, and Scripture History), Mr. Robert Halley, also of Coward College, and Mr. William Rawson Stevenson.

The College Flaherty Scholarship in Mathematics for this year has been awarded to Mr. Edward J. Routh; the annual Longridge Prize of the year 1848, for General Proficiency in the Medical Sciences, was obtained by Mr. William Bayldon.

During the last Session three Students of the College, who had graduated with Honours at the University, were admitted Fellows of the College, viz. Alfred B. Garrod, M.D., Leonard Field, B.A., and the Rev. Henry R. Reynolds, B.A.

THE JUNIOR SCHOOL.

The number of boys in the School this term is 253; in the corresponding terms of the three previous years, commencing with 1846, it was respectively 248, 282, 263. From this comparison the Council have the satisfaction of inferring, that the addition of 1*l.* per term to the former fee of 5*l.* has not been disapproved of. By the increase of receipts the power has been obtained of rendering the instruction more efficient. Additional Masters have been engaged, and several Classes have been subdivided. The manner in which former Pupils of the School acquit themselves at the Examinations of the College and of the University continues to do credit to the training received in the School. Mr. Batty, the University Scholar in Mathematics, and Mr. Routh, the Flaherty Scholar, both proceeded from it; and in the College Examinations of last Session the following distinctions were obtained:—Mr. R. H. Smith, in his first year, the 3rd Certificate in Senior Latin, with an æq., and the 4th Certificate in Senior Greek; Mr. E. W. Wilkins, the 2nd Certificate in Comparative Grammar and the 4th Certificate in Senior Greek, with an æq.; Mr. J. Hayward Evans, the 4th Certificate in German; Mr. Charles Crouch, the 3rd Certificate in Comparative Grammar and the 16th in Senior Greek; Mr. Edward J. Routh, the Prizes in the Extra Senior Mathematics and Senior Natural Philosophy; Mr. Frank Guthrie, the 2nd Certificate in the Extra Senior Mathematics and the 3rd in Senior Natural Philosophy; Mr. Septimus W. Sibley, 2nd Certificate in Senior Mathematics, Higher Division, and in Senior Natural Philosophy; Mr. Edward C. Dunn, 3rd Certificate in Senior Mathematics, Higher Division; Mr. Henry Cood, Prizes in Senior Mathematics, Lower Division, and in Junior Natural Philosophy; Mr. George Gant Beazley, 6th Certificate in Experimental Natural Philosophy; Mr. Alfred Warren, Prize in the Class of Mechanical Principles of Engineering; Mr. Francis Scarth, 2nd Certificate in Civil Engineering; Mr. William Southey, 2nd Certificate in Levelling and Surveying; Mr. W. W. Ladell, 3rd Certificate in the 1st and 2nd Courses and 4th in the 3rd Course of English Law.

LEGACIES AND DONATIONS, &c.

The Council postpone to a future occasion the particulars of the Residuary Bequest of Dr. Holme, the accounts of that Estate not being yet settled; they are informed however that there is nothing to prevent the early closing of the Executorship, and that the necessary papers of release for execution by the College are preparing. The extensive Library has been transmitted entire to the College.

Notice of a Legacy of 100*l.* by Thomas Dyson, Esq., late of Diss, in the county of Norfolk, has been recently received.

In the printed report of last year the Council communicated the gratifying intelligence of a munificent donation. They allude to the gift by a "Friend to Civil and Religious Liberty," whose name is unknown, of a sum of 5000*l.* It was presented through the late Earl of Auckland; to be applied to the purposes of the College in such manner as the Council should see fit; with a condition that the sum shall be kept entire, and designated the Andrews Fund; and that the Scholarships which might be instituted, or other objects to which the income arising from the Fund were applied, should be distinguished by the name of "Andrews." That Fund with the dividends now consists of 6250*l.* 3 per Cents Reduced. The Council, on carefully considering how they could best fulfil the intentions of the Donor, decided on so employing the annual proceeds that they should become an inducement to Students to prolong their period of study in the College. With that view they instituted three Scholarships of 50*l.* per annum each, to be awarded to the best proficients in Latin, Greek, Mathematics, and Natural Philosophy, without limitation as to age. The Regulations respecting these Scholarships will be found in the Appendix, p. 14. The surplus of about 30*l.* per annum will be required for affording suitable remuneration to eminent Examiners.

In determining to divide the proceeds of the Andrews Fund into several Scholarships, as yearly objects of competition, the Council were guided by the experience derived from the Flaherty Scholarships. These last were founded on a different plan, and the number of Candidates has annually been small. The same experience has induced them, the Andrews Scholarships being thus established,

to make a modification in the Flaherty Scholarships, by reducing them to one of 50*l.* annually, so as with the Andrews Scholarships to make four in number, all of the same amount, and subject to the same regulations.

NEW LIBRARY AND LECTURE-ROOMS.

Other considerations also influenced the Council to discontinue the appropriation of the whole of the Flaherty Fund to Scholarships, as by the terms of the original donation they had full power to do. The accommodation for Students in the Library, and the number of Lecture-Rooms, especially in consequence of the progressive increase in the Class of Mathematics, have lately proved inadequate. Mr. Donaldson, Professor of Architecture, advised that these wants might be most advantageously supplied by the erection of a Building at the rear of the College, in the place of that destroyed by fire in 1836. The Council accordingly proceeded to construct a New Library and Lecture-Rooms on that spot, after designs furnished by Mr. Donaldson, and under his superintendence. The basement-floor will afford a Deposit for Models of Machinery and for a Drawing School, and the ground-floor for two Lecture-Rooms, each of which will give ample space for at least 150 Students. One will be assigned to the Class of Mathematics, the other to the Classes of the Medical Faculty. The Library will occupy the upper floor; it will be 90 feet long by 45 in width.

The Council have also thought it right to undertake the completion of the Hall and Dome contiguous to the Library. The Hall and the approaches will be a suitable receptacle for the Works of Flaxman presented by Miss Denman as announced in the last Report. The repair and fixing of these valuable works of Art will necessarily involve considerable expense, and the Council are happy to state that this is to be defrayed by the admirers of that distinguished artist, and will not fall on the funds of the College. The contracts for the New Library and Lecture-Rooms, for completing the Dome, and for the necessary apparatus for warming the whole, are respectively 6313*l.*, 992*l.*, and 352*l.* The outlay will be met by the remainder of the Brundrett Fund in possession, the sum of 500*l.* given by Patriot expressly "towards completing some part of the Building," and such portion of the Flaherty Fund as is not required, under the arrangement already mentioned. To commemorate the munificent benefaction of Mr. Brundrett, which has already enabled the Council to make provision for many pressing calls on the Institution, and which now so opportunely comes in aid, they propose to give his name to the New Building.

PROFESSORSHIPS.

The vacancy in the Teachership of German, occasioned by the death of Mr. Wittich, as announced in the last Report, was soon afterwards filled up by the appointment of Dr. Heimann, who during the illness of Mr. Wittich had conducted the studies of the College Class. Dr. Heimann had been during several years engaged in instructing the pupils of the Junior School. On this occasion, at the recommendation of the Senate, and in consideration of wishes expressed by Students to have a Course of German Literature, the Council re-established the Professorship of German Language and Literature. At the close of the Session Mr. Tom Taylor, desiring to devote himself more exclusively to the Law, resigned the Professorship of English Language and Literature; Mr. A. J. Scott has been appointed to succeed him. In consequence of the absence in Italy of Signor Gallenga, the course of Lectures on Italian Language and Literature for this Session has been omitted.

Soon after the last General Meeting the task devolved on the Council, in obedience to a previous resolution communicated to the Professor of the Chair of Surgery, of providing for the efficient discharge of the duties of that important department of the Medical Instruction of the College. The illness of Mr. Liston for some time previous to his death having deprived Mr. Cooper of the assistance which the state of his health for several years had annually rendered necessary, the Council, with the concurrence of the Senate, and in compliance with the wishes of Mr. Cooper, had, as a temporary arrangement, appointed Mr. Morton to give a part of the Course of Lectures on Surgery, on the understanding that

previous to the close of the Session the whole subject of the provision for the adequate discharge of the duties of the Chair of Surgery would be taken into consideration. While the Council were engaged in this inquiry, Mr. Cooper resigned the Professorship of Surgery, and Mr. Syme soon after gave up the appointment of Professor of Clinical Surgery and Surgeon to the Hospital. After much consideration, the following arrangements were made in consequence of these vacancies. Mr. Arnott, Surgeon to the Middlesex Hospital, was appointed Professor of Surgery and Surgeon to the Hospital, with an allowance of 100*l.* per annum from the College Fund in augmentation of his share of professorial fees; and Mr. Quain, already Surgeon to the Hospital, was appointed Professor of Clinical Surgery, with the stipend of 150*l.* a year, formerly received by Mr. Liston, in consideration of his relinquishing half of the duties and emoluments of the Professorship of Practical Anatomy. Mr. Ellis, who had long and efficiently filled the situation of Demonstrator, was appointed Junior Professor of Practical Anatomy, taking that part of the Course which had been relinquished by Mr. Quain.

In order to place the Museum of Anatomy under the most favourable supervision for its arrangements and increase, Dr. Sharpey, relinquishing the augmentation of 150*l.* per annum which had been made to him in 1846, and being at the same time released from the contribution of 50*l.* per annum towards the salary of the Demonstrator, was appointed Director of the Museum of Anatomy at a salary of 100*l.* per annum, an office formerly held by Dr. Carswell. Mr. Morton has been appointed Surgeon to the Hospital, and Mr. Erichson and Mr. Marshall Assistant Surgeons.

The term for which Dr. Croft had been elected to the office of Apothecary to the Hospital having expired, Mr. Clover was appointed in his place.

The Professorship of Practical Chemistry has become vacant by the lamented death of Dr. Fownes. On the institution of the Birkbeck Laboratory in 1845, Dr. Fownes, who at an early period had been Chemical Assistant in the College, and since Lecturer for the Pharmaceutical Society, was selected to superintend the new department of practical instruction. He was recommended for this office by the reputation which he had acquired by his researches and discoveries in Organic Chemistry, which indicated great clearness of perception and much precision in the operations of analysis, and gave promise of a distinguished scientific career. As a teacher Dr. Fownes proved highly successful, and organized an excellent Course of Laboratory instructions, by which a large number of pupils have benefited. The Council are desirous to testify their regret at his premature decease, and their respect for his character and attainments.

The Professorships of Oriental Languages and of Chinese are still vacant.

HOBART TOWN HIGH SCHOOL.

The Council have had the satisfaction of rendering a service to a kindred Institution in Van Diemen's Land. On the application of the Council of the Hobart Town High School, they have, with the assistance of the Senate as in the case of their own Professors, selected a Classical Head Master. Out of sixty-three applicants, many of them very highly qualified for the important charge, the Council recommended Mr. J. A. Froude, M.A., Fellow of Exeter College, Oxford.

FINANCES.

The account at page 10 of Receipt and Expenditure for the Session 1847–48, shows an application of 532*l.* 19*s.* 8*d.* of the Capital of the College to the expense of the year. One side contains an item of 1552*l.* 10*s.* produced by the sale of Consols, to provide for the payment of the first instalment to the Contractor for the New Building; on the other there appears an increase in the Balance at the Bankers of only 1019*l.* 10*s.* 4*d.* Against this draught on the Capital are to be set, 1st, as in former years, 300*l.* the augmentations of Professors; 2ndly, 304*l.* increase in proportional payment for Masters in the Junior School, in consequence of the commencement of reforms desired by the Council, to provide for which in future years the increase in the fee of admission was determined on. But for these extraordinary expenses the receipts, exclusive of the sum derived from the sale of Stock, exceeded the ordinary expenses.

THE DEATH OF THE EARL OF AUCKLAND.

The Council will best discharge the painful task of noticing the decease of one of their own body, the late Vice-President of the College, by communicating the entry on their Minutes, by which they expressed their feelings on that mournful occasion. It is as follows:—

"The Council have the melancholy duty of recording the death of one of those Members who took an active and prominent part in founding the Institution. In the Earl of Auckland the College have lost a steadfast friend, whose zeal for their interests never abated from his first joining the Committee which raised the Institution into existence until the close of his life.

"Called to fill the highest offices of State, his Lordship was withdrawn for a time from aiding the Council in its deliberations; but on his return from India he resumed his seat at this Board, became Vice-President, and again took an active part in administering the College affairs; and, although these duties were again interrupted by his Lordship being called to Her Majesty's Councils, till within a very short time preceding his death he was actively engaged within the walls of the College.

"The Council place upon their Minutes this tribute of profound respect to his Lordship's memory."

THE HOSPITAL.

The Council have again to recommend the Hospital as an object requiring and deserving strenuous exertions from all the friends of the College. During the last two years considerable debt has been incurred. The Council shortly before Christmas set on foot a subscription in its behalf, and their appeal has been very generously responded to. The contributions have amounted to 1204*l.*

Notice has been received of the following Legacies:—

By Mrs. Kennedy, 500*l.*; by the late Wm. Sawyer, Esq., of York, 19*l.* 19*s.*; by the late Col. Purchas, a portion of his residuary estate; by the late Mr. Robert Kane, 300*l.*, a bequest confirmed by Her Majesty, on whom the property had devolved in consequence of the informality of his testamentary papers.

The Hospital is in extreme need of further aid.

APPENDIX.

ANDREWS SCHOLARSHIPS.

The Council, with the view of inducing Students to prolong their period of study in the College, have determined on applying the income of the Andrews Fund to three Annual Scholarships of £50 a year each, to be awarded to the best Proficients in Latin, Greek, Mathematics and Natural Philosophy, without limitation as to age, under the following

REGULATIONS.

1. Each candidate for a scholarship must have been, during the Academical year immediately preceding, either a matriculated Student in the College, or a Pupil in the Junior School: if a Student, he must have attended during the same year at least two long Courses of Lectures, or one long and two short Courses, or four short Courses, of the Faculty of Arts.

2. Those Courses will be accounted long Courses in which Lectures are delivered during eighty hours in the Session; and those Courses only will be counted as short Courses in which Lectures are delivered during forty hours in the Session, and less than eighty. Attendance on either French or German, the Course consisting of eighty hours of Lectures, will be counted as attendance on a long Course, but not attendance on both as two long Courses. A Student will not be accounted to have attended a Class unless he go through the Examinations of that Class, both before Christmas, if the Class is then examined, and at the close of the Session. In case of there being no examination of the Extra Senior Classes of Latin and Greek, a Student desirous of counting attendance on those Courses must go through the Examinations of the ordinary Senior Classes.

3. He must announce his intention on or before the 30th June, and forward to the Council certificates of satisfactory attendance and general good conduct from every Professor in the Faculty of Arts whose lectures he has attended, or from the Head Master of the Junior School. Provided, however, that when a Student shall have attended lectures during more than two Sessions, Professors' Certificates shall be required only for the last two Sessions of such attendance.

4. The Examination to begin on some day between the 1st and 6th October, appointed by the Council: and to be conducted by printed papers, the papers of each Examiner being previously submitted to the other Examiners for their approval. The answers to be inspected by every Examiner.

5. If the Examiners be not in the first instance unanimous in their opinion respecting the superiority of any candidate, all to re-examine the answers sent in by every Student respecting whom the Examiners shall not be unanimous, and a majority of Examiners then to decide; but if there be no majority, a fresh examination to take place of the Students thus placed in opposition by the Examiners.

6. The Examiners to be appointed by the Council.

7. The Council will withhold all or any of the Scholarships in the event of the majority of the Examiners being of opinion that the candidate or candidates have not sufficient merit.

8. For every Scholarship not awarded, an extraordinary Scholarship may be awarded in the next year, together with, but independently of, the ordinary Scholarships then to be given.

9. Each Scholarship will be tenable for one year only, and be payable, in the succeeding Session, by two equal instalments, on the 1st November and 1st July. To be entitled to the payment of the instalments, the Scholar must produce to the Council Certificates from Professors of regular attendance during the current Session on two Classes in the Faculty of Arts.

10. The Scholar may be twice re-elected to a Scholarship, provided he continues to be a Student of the College according to the first Regulation.

FLAHERTY SCHOLARSHIPS.

After 1850 there will be a fourth annual Scholarship, of £50 a year, to be awarded and held in the same manner as the Andrews Scholarship, and called the Flaherty Scholarship.
